I'm Winston Wu, Founder of **HappierAbroad.com**. We are the first movement and website that offers a **Proven Overseas Solution** to the loneliness, isolation, datelessness, insecurity and high cost of living that plagues many in America. We present the **Benefits of Living and Dating Overseas** that have helped many. First, here are the major problem areas in America that are toxic and dysfunctional, yet taboo to mention:

1. The social environment is isolating, lonely and devoid of human connection. People live in their own bubble and are disconnected. They are unfriendly, fake, soulless and superficial.
2. Trying to date women is excessively difficult and problematic. They are unfriendly, unapproachable and spoiled with toxic personalities. Every desirable woman seems to be taken or too picky.
3. The culture is toxic to one's self-esteem, personality and mental health. People feel insecure and inadequate to the core. They develop big egos and become assholes to survive. Or they go crazy.
4. Cost of living is too high, healthcare costs are astronomical, and food is unhealthy.

So overall, **America is highly toxic to one's mind, body, soul and relationships**. As the great Indian sage Jiddu Krishnamurti stated, "*It is no measure of health to be well adjusted to a profoundly sick society.*" But these truths are TABOO to mention (especially #2), lest you be seen as a "loser", for our culture only allows you to act fake and pretend that everything is great, or blame yourself - neither of which changes anything. However, the **Good News** is that in most other countries these areas are **REVERSED**:

1. The social atmosphere is more open, friendly and inclusive. People are authentic, modest and down-to-earth. They are easier to meet and connect with. There is real connection and camaraderie.
2. Meeting and dating women comes easily and naturally. Women are sweet, friendly, feminine and down-to-earth. They are more approachable, open, sociable, engaging, curious, and warm.
3. The social culture is more accepting and wholesome. Thus you develop a normal healthy personality without inferiority complexes or psychological baggage. No one has to see a therapist.
4. Cost of living and healthcare are more affordable, and food is healthier.

Now ask yourself: Which of these two social cultural environments would YOU be happier in? Yet most people never hear about these comparisons because they are so taboo. So that's what we are here for, to disseminate these life-changing truths to those in need. **We know that once you go abroad and experience all this, your life will change forever!** Our site provides abundant material - articles, ebooks, photos, videos, podcasts, blogs, forums and testimonials - that back up and prove all these comparisons conclusively. We've changed lives and inspired many people like you to become "Happier Abroad" 😊

So let us open your eyes and show you a better life overseas!
